Functions of your UltraVac+

The Drying Chamber – Displaces moisture trapped within the hearing instruments. You can place two ITEs, or one BTE with an earmold, into the chamber at one time.

The Vacuum Wand – Used to extract ear wax and debris from the receiver tubes, microphone tubes, vents and battery compartments of the hearing instruments.

The Pressure Function – Used to clear obstructed Vacuum Wand Tips and to blow debris from the receiver tubes, microphone tubes, vents and battery compartments of the hearing instruments.

The Vacuum & Pressure Wands work simultaneously.
